Important Risks

Investments involve risk. Principal loss is possible. ***Equity Investing Risk****. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments.* ***Passive Investment Risk****. The Fund is not actively managed, and the Sub-Adviser will not sell any investments due to current or projected underperformance of the securities, industries or sector in which it invests, unless the investment is removed from the Index, sold in connection with a rebalancing of the Index as addressed in the Index methodology, or sold to comply with the Fund's investment limitations (for example, to maintain the Fund's tax status). The Fund will maintain investments until changes to its Index are triggered, which could cause the Fund's return to be lower than if the Fund employed an active strategy.* ***Tracking Error Risk****. As with all index funds, the performance of the Fund and its respective Index may differ for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.* ***Index Calculation Risk****. The Index relies on various sources of information to assess the criteria of issuers included in the Index, including fundamental information that may be based on assumptions and estimates.*

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the fund. Any applicable brokerage commissions will reduce returns.
